

VIAssist 2.6.3 Windows Server 2008 Additional Instructions

November 7, 2011

Introduction

This document contains additional installation instructions for installing VIAssist 2.6.3 on Windows Server 2008. If VIAssist is being installed on this platform, please follow the steps listed below prior to following the general installation guide.

Pre-Installation Steps for Windows Server 2008

- 1. Log in to the Windows Server 2008 machine as an administrator.
- 2. Launch the Server Manager application. This can be found by going to Start » All Programs » Administrative Tools » Server Manager.

3. Click "Add Features" from within the "Features Summary" section.

4. Expand the ".NET Framework 3.5.1 Features" item, and ensure that ".NET Framework 3.5.1" is selected.

Add Features Wizard		X
Select Features		
Features Confirmation Progress Results	Select one or more features to install on this server. Features: Image: Image: NET Framework 3.5.1 Features Image: Ima	Description: Microsoft .NET Framework 3.5.1 combines the power of the .NET Framework 2.0 APIs with new technologies for building applications that offer appealing user interfaces, protect your customers' personal identity information, enable seamless and secure communication, and provide the ability to model a range of business processes.
	< Previous Next :	> Install Cancel

5. If ".NET Framework 3.5.1" was already selected and installed (as shown below), click "Cancel" and proceed with step 10.

6. Click "Next."

< Previous	Next >	Instal	Cancel

7. On the confirmation page, click "Install."
